HOW TO USE THIS BOOK

This book contains two indices. The first is an index to the names of the deceased; the second, an index to the names of the executors or administrators.

1. All names have been transcribed to duplicate the entries in the county records as accurately as possible. Obvious misspellings have been copied.

2. The DOC column contains and A, an I, or is blank. The A and I indicate that the record is either an administration or inventory document. If the column is blank, the document is a will.

3. Entries in the BOOK column represent a system of coding which appears to be unique to Maryland. After Will Book 1 was filled, books thereafter were coded with the initials of the Register of Wills. All entries in the BOOK column refer to recorded copies of documents.

4. The FILE column contains the numbers of the files of original documents beginning in 1845 at which time the file numbering system was initiated. Such files may contain a variety of pertinent data.

5. The REF column contains arbitrarily assigned keys to additional facts that may help you decide the usefulness of the designated document.
